Leica **RTC**

A new dimension in reality capture

Leica GEOSYSTEMS

Introducing the new Leica RTC.

One trusted design. Three levels of performance.

Built on Leica Geosystems' mastery in 3D laser scanning, the new Leica RTC connects scanners, software and cloud collaboration into one real-time workflow architecture across field, cloud and office.

Data is shared as it's captured. Teams stay aligned as work unfolds. Individual scans become coordinated project intelligence.

Advanced scanning.
Real-time collaboration.
Scalable workflows.

Experience Leica RTC.
